**Total Modules: 13**

**Duration: 3+ Hours**

1. Workbook Events
2. Worksheet Events
3. Application Events
4. Handling Events with VBA Code
5. Disabling and Enabling Events
6. User Forms and Input Validation
7. Designing User Forms – With Code
8. Adding Controls to User Forms
9. Working with User Form Events
10. Interacting with User Forms
11. Validating User Input
12. Creating Custom Functions and Formulas
13. Automating Tasks with Macros

---

**\*This course includes chapter-wise MCQs & a Final Assessment**

## Introduction

This Excel automation using VBA training course brings you a new perspective on operating Excel with advanced and custom formulas and functions developed using VBA code and using VBA to make the most of the processing automation. It is a self-paced course which means there is no set time for you to complete the course or to burden yourself with a deadline. The course covers all the critical topics related to advanced Excel functions, particularly linked with events and automation techniques to process data in less time and through a hassle-free process.

The course is a paid course but remains accessible for one whole year from the date you buy it. It comes along with downloadable Excel templates, that can be accessed from anywhere online through any device such as mobile, desktop, laptop or tablet. The entire course outline is structured in such a way that it helps both beginners and professionals to train themselves for future and current job roles. Through examples and case studies, we ensure that you develop a clear idea of all the topics covered. Additionally, purchasing the course grants you 1-year unlimited access to revisit modules as needed. Enroll today to begin mastering Excel and advance in your career!

## Course Highlights

- ✓ Unlimited one-year course access
- ✓ Pre-recorded videos
- ✓ Get certified upon course completion
- ✓ Real-world examples and case studies
- ✓ Downloadable Excel Templates

## Learning Format

We offer online self-paced learning content to accommodate flexible learning schedules.

## Prerequisites

If you are interested in this Excel automation course and planning to buy it, let us inform you that you would require basic-level knowledge concerning Excel operations as this is an advanced course that deals with complex formulas and functionalities of MS Excel. If you do not have a basic understanding of Excel operations, you can take up our free basic course in Excel to develop the required knowledge. Learn more about our course in the FAQ section below.

 A stable internet connection

 Laptop, desktop, tablet, or other device

 Access to MS Excel

## Who Should Attend

 Professionals

 Analysts seeking to streamline data analysis processes.

 Entrepreneurs

 Students and educators aiming to excel academically and professionally

 Anyone Interested in learning to advance Excel

## What You Will Learn

WallStreetMojo has designed this comprehensive Excel automation using VBA course to revolutionize the way you operate in Excel completely. If you are someone who is constantly navigating through spreadsheet columns and rows, constantly updating data manually and spending hours and hours to consolidate the data, this course is just for you. In this training program, you will learn user input validation, macro automation tasks and input validation along with the use of VBA code to develop custom functions and events in MS Excel.

## Acquired Skills

- Excel Automation
- User input validation
- Enabling and disabling events
- Using VBA code to create custom functions and events
- Macro automation and custom cell formatting and filters

## Job Market Analysis

- Corporate Data Analysis
- Financial Modeling
- Scenario Analysis

Financial Analysts - Average Salary

\$95,000
