Course Highlights

- ✔ Self-paced comprehensive course
- ✔ Pre-recorded videos
- ✔ Downloadable Excel Templates
- ✔ Real-world examples and case studies

Learning Format

We offer online self-paced learning content to accommodate flexible learning schedules.

Prerequisites

Our courses are designed to be inclusive and accessible to all. Anyone with a basic knowledge of computer operations trying to begin learning Excel or a budding finance professional looking to boost their career in finance and improve their knowledge through MS Excel for finance course and its applications regarding financial analysis can consider taking the course. No prerequisites are required—just a stable internet connection and access to MS Excel. After completing this basic-level module, you will gain a solid understanding of Excel and take a significant step toward personal and professional growth.

 A stable internet connection

 Access to MS Excel

Who Should Attend

 Professionals and students aiming to enhance Excel skills for better job prospects and productivity

 Accounting and Finance graduates

Entrepreneurs, Finance Professionals, Investors, and Business

 Owners with Finance knowledge

 Existing Excel users looking to fill knowledge gaps or learn advanced features

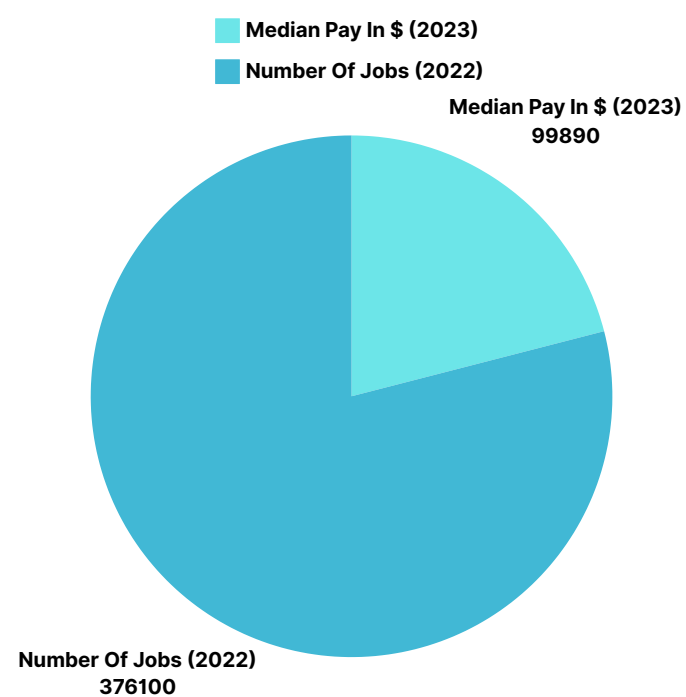

What You Will Learn

This Excel in finance course assists you with basic calculation functions and finance formulas to calculate and process financial data. For example, even if you are not a finance professional, you will be able to derive personal financial calculations, for example, EMI calculations, loan and mortgage payments. The functions can even help in investment analysis and decision-making. At the same time, you will get familiar with sensitivity analysis, goal seeking and solving. What are you waiting for? Enrol today and start your learning journey.

Acquired Skills

- Advanced Formulas (e.g., IF, VLOOKUP, INDEX/MATCH)
- Data processing techniques
- Data Analysis Tools (e.g., Goal Seek, Solver)
- Personal finance and interest rate calculations
- Scenario Analysis and Sensitivity Analysis
- PivotTables and PivotCharts

Job Market Analysis

Popular in Industries

Popular Profiles
