FINANCIAL PLANNING & ANALYSIS FUNDAMENTALS

Course Curriculum

Modules

Total Modules: 07

Duration: 10+ Hours

1. FP&A Essentials
2. Building Effective Budgets
3. Mastering Forecasting Techniques
4. Understanding Financial Statements
5. Cost Management for FP&A
6. Financial Modeling for FP&A
7. FP&A for Strategic Decision Making

***This course includes chapter-wise MCQs & a Final Assessment**

Introduction

Commence your journey with the capital budgeting and forecasting methods to prepare budgets for that period. Additionally, with popular case studies like JPMorgan and other firms decode their FP&A structure and learn to perform ratio and financial statement analysis. Nonetheless, you also get familiar with the basic accounting techniques, principles, and practices followed by FP&A analysts worldwide.

With our financial planning and analysis certification, you have access to multiple Excel templates. Download them whenever needed and gain insights from the financial modeling and cost accounting methods explained. Learn the different types of budgets, costing types, cost management, and cost-volume-profit analysis. Also, get comfortable with financial statement analysis, three statement models, and reading annual reports. Furthermore, delve into FP&A job prospects, its role in mergers and acquisitions, and much more. Along with this, you have many other benefits!
